Orizzonte Polska has been operating in the market since 2003. The company is an innovative, fast growing enterprise based on new technologies. The right combination of inventive solutions, technologically advanced equipment and the work of experienced hands ensures that our services meet the current, dynamically changing market needs.

Professional staff, modern machinery and a full range of services – from design, through production, to regeneration – ensure we are able to meet all customer expectations.

Our team includes CNC operators, quality engineers and technologists trained by Italian specialists. By combining Italian technology with Polish precision, we achieve European design standards, guaranteeing shorter lead times and full technical support (engineering, service and consulting).

Currently, our main customers are ceramic tile manufacturers from Poland and Central and Eastern Europe.

In 2007, Orizzonte Polska obtained the ISO 9001 Quality Certificate, which is regularly recertified. In accordance with the Quality Policy, the company's primary goal is continuous quality improvement in the production and regeneration of molds and punches for industry. Meeting the requirements of the ISO standard and consistently improving the implemented quality system are the strengths of the company's quality-oriented policy.

A rigorous quality control system and the use of modern equipment and measuring instruments ensure that the services we offer are characterized by the highest precision.

We are a workshop located in Końskie, Świętokrzyskie Voivodeship, focused on the production and regeneration of molds and punches for the ceramics industry.

Due to the actual situation in the construction market, we are currently undertaking a number of initiatives aimed at diversifying our production into new markets and industries. For projects requiring new technologies and machinery, we prioritize development and we are prepared to purchase specialized machinery for specific, long-term orders.

Below is an overview of our key machines and technologies that guarantee reliable performance.

CNC milling machines/Centra frezerskie CNC				
Machines	Axes			Internal cooling
Daewoo Mynx 650	X1200	Y500	Z550	No
Daewoo Mynx 540	X1000	Y450	Z550	No
Awea BM-1600	X1500	Y700	Z700	No
Awea BM-1800	X1850	Y800	Z700	Yes
Awea BM-1800	X1850	Y800	Z700	Yes
Awea SP 3016	X3000	Y1500	Z600	Yes
ZPS	X1150	Y500	Z450	No
Surface grinding machines/Szlifierki powierzchniowe				
Rosa Ermando	X2000	Y600	Z700	
Rosa Silver	X2000	Y1200	Z650	
Proth	X3000	Y1500	Z630	
Rosa Silver	X1300	Y500	Z500	
Hardening small kiln/Hartowanie mały piec				
Dimensions			Max temp	
X530	Y700	Z350	1000°C	

All of the above-mentioned machines are equipped with magnetic plates.

Our machinery includes a press department for vulcanizing metal surfaces with rubber or resins (max. vulcanization area 1300mm x 1300mm).

Our technical resources also include other machines and equipment necessary for the complete production process.
